### *Mission Statement*

**"To maximize our clients return on investment in Oracle technology by providing high quality business solutions, on time and within budget."**

**The Oracle Consulting Group consists of over 700 consultants who can help you to:**

- use CASE\*Method for systems development and maintenance,
- implement Oracle's application products, including installation, modification, customization and integration,
- tune databases and applications,
- build applications,
- conduct performance studies on databases and networks,
- perform independent quality assurance reviews,
- offer high-level management consulting, and
- provide system integration services.

**Oracle consultants have experience across various industries, including manufacturing, government, higher education, financial services, travel and transportation, telecommunications and pharmaceuticals. They have early direct access and first hand experience with all Oracle technology.**
